HYBRID TEA ROSES

Hybrid-tea, or commonly called ever blooming roses, have proven to be the most popular and useful roses for the garden. Their flowers have beautiful form, fragrance and color in bewildering variety. The bushes usually grow $1\frac{1}{2}$ to 3 feet high. All the varieties listed here are hardy enough to withstand the winter in almost all parts of the United States and Canada, provided they are properly protected when zero weather occurs.

Our Roses are 2 Year Old Field Grown, budded on 3 year old Japonica Multiflora understock. This understock is conceded to be the best general one to use because of its vigor, hardiness and wide adaptability to varying climatic and soil conditions. It is used by leading reputable rose growers. Our roses are grown in fertile clay in northern Ohio under expert care. Much of a plant's success depends upon its roots. Our soil and methods emphasize the development of good root systems. The bushes are regularly sprayed and dusted to prevent diseases, thus insuring the purchaser healthy, vigorous and hardy plants.

Many people are under the impression that growing roses requires special skill and much labor. A rose is like any other living thing, and if given half a chance, will reward the grower with an abundance of quality blooms. One of the most important factors to insure success with roses, is to purchase good plants. Bargain, or cheap roses, may give results (but their chances of re-establishment, growth and bloom are far less and in most cases they die in a year or two. The contrast between the results obtained with cheap roses and that obtained with planting good ones is so great that the difference in price is well worth while.

Having reasonably good soil and good plants to start with, preferably fresh from the grower, roses will amply reward the purchaser. We most urgently recommend fall planting. The advantages of fall planting are many. The ground can be worked easily in the fall, for there are no hard, frozen lumps to break up. Usually there is plenty of moisture in the soil and artificial watering will not be needed. Roses planted in the fall usually have 2 to 5 weeks advantage of the roses planted in the spring.

Complete planting instructions sent with each order.

We offer these climbers that bloom in spring and fall, which are hardy enough for all sections of the country.

FOR THE BEST RESULTS PLANT ROSES IN THE FALL

Our own test prove the best results are obtained by planting in the fall.

Rose-Lea Gardens Roses are guaranteed to survive the winter if you hill them with clean soil about 10 inches high leaving upper branches exposed. In the spring remove banking and prune off dead wood. If you find any dead plants in the spring we will replace them free of charge.

OUR GUARANTEE

Our Rose Plants are strong 2 year old dormant everblooming Roses that are guaranteed to bloom next spring. We guarantee our Roses to reach the customer in good condition and true to name.

You can buy with confidence from
Rose-Lea Gardens. **YOU RUN NO RISK.**

Every rose plant which is purchased from us is guaranteed to grow and bloom or we will replace the plant or refund its cost.

Our policy is "WE AIM TO SATISFY"

As a popular service, we prune your Roses,
ready to plant.

Prices: One 65c rose free with each order of \$5.00. On all orders of \$25.00 or more, 20% discount. Orders of 100 or more roses $\frac{1}{4}$ discount in quantities of 5 or more of a kind. No discounts on the specials.

If unable to fill order please state if we may substitute
